1.	Transmittal	of t	he	translation	to	the a	opplicant.
A. +	A A SARRUALIA DE SAGE	V. W.	***	DE STEEDRICK WAY AN			· P P · · · · · · · · · · · · · · · · ·

1	The International Bureau transmits herewith a co	py of the English translation	of the international p	oreliminary report or
	patentability (Chapter I).			

PROFIL-VERBINDUNGSTECHNIK GMBH & CO. KG et al

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

KR

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/012991

Box	No. I	Basis of the report
1.		regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise ated under this item.
		This report is based on translations from the original language into the following language which is the language of a translation furnished for the purposes of: international search (Rule 12.3 and 23.1(b))
		publication of the international application (Rule 12.4)
		international preliminary examination (Rule 55.2 and/or 55.3)
2.	recei	regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the iving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to report): the international application as originally filed/furnished
		the description:
		pages 1,3-27 as originally filed/furnished 19.09.2005 with letter pages* 2,2a received by this Authority on of 19.09.2005
		pages* received by this Authority on
	\boxtimes	
		the claims:
		nos as originally filed/furnished
		nos.* as amended (together with any statement) under Article 19 19.09.2005 with letter
		nos.* 1-57 received by this Authority on of 19.09.2005
		nos.* received by this Authority on
		the drawings:
		sheets 1/4-4/4 as originally filed/furnished
		sheets* received by this Authority on
		sheets* received by this Authority on
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3.		The amendments have resulted in the cancellation of:
		the description, pages
		the claims, nos.
		the drawings, sheets/figs
		the sequence listing (specify):
		any table(s) related to sequence listing (specify):
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
		the description, pages
		the claims, nos.
		the drawings, sheets/figs
		the sequence listing (specify):
		any table(s) related to sequence listing (specify):
*	If ite	m 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/012991

Вох			ticle 35(2) with regard to novelty, inventive step or industrial applicability; oporting such statement	
1.	Statement			
	Novelty (N)	Claims	1-57	_ YES
		Claims		NO
	Inventive step (IS)	Claims	1-26, 28-57	YES
		Claims	27	_ NO
	Industrial applicability (IA)	Claims	1-57	YES
		Claims		NO

- 2. Citations and explanations (Rule 70.7)
 - 1 Reference is made to the following document:

D1: US-A-3 736 969 (WARN H, SW ET AL)
5 June 1973 (1973-06-05).

- 2. INDEPENDENT CLAIM 1
- 2.1 Novelty

Document D1 is considered to be the prior art closest to the subject matter of claim 1. Said document discloses a functional element as per the preamble of claim 1.

The subject matter of claim 1 consequently differs from the subject matter of document 1 in that an annular recess is provided between the annular lip and the free end-face of the stamped segment.

The subject matter of claim 1 is therefore novel (PCT Article 33(2)).

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

2.2 Inventive step

Box No. V

The problem of increasing the strength of an assembled component by using thick sheet metal parts is solved in that, in addition to the use of the annular groove and the annular lip (see the description in the application, page 18, lines 21-22), the annular recess allows the functional elements to be attached even more securely to the sheet metal part (see page 19, lines 12-20).

The solution to the above problem, as proposed in claim 1 of the present application, involves an inventive step (PCT Article 33(3)). The reasons are as follows:

the available prior art contains nothing that might encourage a person skilled in the art to arrange the annular recess in such a manner.

3. INDEPENDENT CLAIM 27

- 3.1 Dependent claim 27 does not contain all the features disclosed in claim 1. Claim 27 should therefore be considered an independent claim.
- 3.2 The subject matter of claim 27 differs from the functional element known from D1 in that the lip is annular.

/ . . .

International application No.

PCT/EP2004/012991

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The solution to the above problem, as proposed in claim 27 of the present application, cannot be considered inventive (PCT Article 33(3)). The reasons are as follows:

the lip is annular because the stamped segment, likewise, is annular; a rivet with an annular stamped segment is a conventional design in the art.

4. INDEPENDENT CLAIM 34

4.1 Novelty

Document D1 is considered to be the prior art closest to the subject matter of claim 34. Said document discloses an assembled component as per the preamble of claim 34.

The subject matter of claim 34 consequently differs therefrom in that the sheet material fills the annular recess, at least in part.

The subject matter of claim 34 is therefore novel (PCT Article 33(2)).

4.2 Inventive step

The arguments in this regard are similar, mutatis mutandis, to those set out in Box 2.2 above.

/...

International application No.

PCT/EP2004/012991

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

6. INDEPENDENT CLAIM 57

6.1 Novelty

The available prior art does not disclose either a functional element with the features of the preamble of claim 57 or a method for the manufacture thereof as per the characterising part of claim 57.

The subject matter of claim 57 is therefore novel (PCT Article 33(2)).

6.2 Inventive step

The available prior art contains nothing that might suggest to a person skilled in the art either a functional element of this kind with an annular lip and an annular recess between said lip and the free end-face of the stamped segment or methods for the manufacture thereof.

The solution to the above problem, as proposed in claim 57 of the present application, therefore involves an inventive step (PCT Article 33(3)).

7. DEPENDENT CLAIMS

Claims 2-26 and 28-33, if considered to be dependent on one of claims 1-26, and dependent

/ . . .

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/EP2004/012991

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	claims $35-52$ and $54-56$ therefore also satisfy the
	requirements of the PCT in respect of novelty and
	inventive step.
